UNLIKE Victoria and Tasmania, South Australia was settled by a number of enterprising gentlemen, who had formed themselves into an association, under the authority of the Imperial Legislature, for the colonisation of the country, upon the broad and liberal principle that it should not cost a penny to Great Britain; that there should be no state church, and no transportation to its shores. The first settlers landed in Holdfast Bay, on the 28th of December, 1836; and soon afterwards, the site of the future capital was selected, on the banks of the Torrens, and the incipient city received the name of the then Queen, Adelaide. The infant settlement passed through the usual vicissitudes incidental to young countries; but the first colonists were composed of men of no ordinary force of character. They were not daunted or disheartened by temporary reverses. They had an invincible faith in the country, in its fine resources, and in its splendid future; and most of them lived to witness the fruition of their hopes, and to participate in the prosperity, which rewarded their energy, their perseverance, and their dogged determination to succeed. And at this moment, forty-four years after the foundation of the colony, it may be confidently asserted that there is no portion of Her Majesty's dominions, in which the average standard of welfare is higher than it is in South Australia.

The first Constitution of the colony was granted in 1851, and the second in 1856. The latter conferred upon it the amplest powers of self-government; and it must be recorded to the credit of its politicians, that these

## THE FUTURE OF AUSTRALIA.

THE PROBABLE ACHIEVEMENTS OF SCIENCE IN EXPEDITING AND FACILITATING INTER-COMMUNICATION—THEIR EFFECTS UPON CIVILISED MANKIND GENERALLY—GENERAL LEVELLING UP OF SOCIETY, AND ITS ADVANTAGES—AUSTRALIA WILL LARGELY PARTICIPATE IN THE PROSPERITY THAT IS OCCASIONED—A POPULATION OF FIFTEEN OR TWENTY MILLIONS UNDER FREE INSTITUTIONS IN A COUNTRY TEEMING WITH WEALTH—EXPANSION OF TRADE WITH GREAT BRITAIN, AND INCREASED PRODUCTIVENESS OF AUSTRALIA—FEDERATION OF THE COLONIES—ITS PROBABLE RESULTS—THE GREAT NORTHERN PORT OF THE FUTURE.

IN forecasting the future of Australia, we have very little guidance from the past history, either of this group of colonies themselves, or of the United States of America, for the twentieth century will resemble none of its predecessors. We have entered upon an era of discoveries in science, altogether without precedent, and the wildest predictions of the most imaginative writer might altogether fall short of the most prosaic facts which will be actually realised during the next fifty years. Steam may be altogether superseded as a motive power. A fortnight may suffice for the journey from London to Sydney, or Melbourne. It may be assumed, as a matter of certainty, that a transcontinental line will connect the whole of the southern or eastern cities of this continent with some northern port, and that there will be a direct and uninterrupted line of overland railway communication from Madras to Calais, and thence by submarine tunnel to the capital of the British Empire. London will be in speaking communication with every city in the civilised world. The ideas of space and time, as we now conceive, or receive, them, will be no longer current. The globe itself, as a mental concept, will have shrunk into very small dimensions. A voyage round it will have contracted to the proportions of a pleasure excursion. The history of the whole world, as it is written day by day, in the columns of its myriads of newspapers, will be epitomised each evening in the great centres of intelligence, and published next morning by the journals of all the principal cities of the earth. Science will have perfected engines of destruction and implements of warfare, to such an extent that the choice of two alternatives will be offered to mankind—the abandonment of war, or its pursuit under circumstances, which would involve something

 BELONGS TO AUSTRALIA, AS THE PAST DOES TO THE OLD WORLD.

To an Anglo-Australian not devoid of human sympathies, few things appear more inexplicable, than the indifference, not to say apathy, which prevails in the minds of his fellow countrymen at home on the subject of emigration. It is one in which all classes of society, and men and women belonging to every grade in life, should feel a deep and vital interest. Nor can it be denied, that Great Britain is overcrowded, and that notwithstanding the enormous expansion, which every branch of industry has undergone since the country was emancipated from the galling and debasing manacles of protection, the struggle for existence continues to be an arduous one. Indeed, it may be said to be more arduous than ever, because one effect of free-trade has been to elevate, by the general prosperity it has diffused, every stratum of the social edifice. The labouring man of to-day is better off than the artisan of forty years ago; the artisan than the small shop-keeper of the same period; the large trader than the merchant; the merchant than the territorial magnate, and so on. But this remarkable change has not been accompanied or followed by greater thrift. On the contrary, the expenditure of all classes upon articles of food and clothing, of comfort and luxury, has increased even more than commensurately with the increase of their earnings or income; their artificial wants are greater and more numerous than ever they were, and the result is, that the battle of life has become increasingly severe, by reason of the higher standard of living which has been established, and the extravagance which has attended upon a lengthened period of unprecedented prosperity.

# Getting around this CD

## Navigating Archive CD Books CDs

---

All Archive CD Books products can be navigated easily using the handy bookmarks on each CD. The table of contents in most original books, and the original book index where it exists, can provide additional ways of finding the information required.

## Searching Text on Archive CD Books Australia CDs

---

Optical Character Recognition (OCR) technology has been developing over the years as a useful mechanism to convert images (as Archive CD Books pages are) into text which can be searched. The quality of the OCR can still vary, and hence the searchability can vary. Around 95% or 99% of the words in books with good type are searchable—or even higher with very good type.

*OCR is now a wonderful searching aid in many instances  
but there is still no substitute for reading the book!*

## Different Versions of Adobe Acrobat Reader

---

Adobe Acrobat Reader 4 or later should be used. Adobe Reader 6 (as it is now named) in fact has considerably better searching options and is recommended.

- **Acrobat Reader v4** has both a “Find” and a “Search” tool. Those tools are two \*totally\* different things. Our CDs (that are searchable) work with the \*FIND\* tool
- **Acrobat Reader v5** has only a “Find” tool (not a “search” tool). Our CDs (that are searchable) work with the \*FIND\* tool.
- **Adobe Reader v6** has only a “Search” tool (not a tool labelled “Find”). HOWEVER — what is called “Search” is the same as the tool that used to be called “Find” Our CDs (that are searchable) work with the \*SEARCH\* tool

## Tips For Searching and Getting More From the CD Books

---

- update to Adobe Reader 6 for more versatile searching options, including the ability to bring up a list of all instances of the word you are searching for — across multiple files on a single CD in a single search request.
- enter the MINIMUM number of characters needed to bring up the search results required.
- use Adobe Reader 6 to do some trial searches to try to identify the characters that may be misread. These can show up in the extra text in the search results list (Adobe 6 only). A few minutes trial will help you to avoid using characters that are more prone to being misread, e.g. try entering “rederi” if you want “Frederick”, but find that the letters “F” “c” and “k” are sometimes misread.
- use the “Match whole word” option to eliminate unnecessary items in your results list, e.g. to eliminate all the blacksmiths and tinsmiths etc when you only want the name Smith.
- use the “Match case” option to eliminate all the occupations “smith” if you only want the name “Smith”.
- don’t just search for names. Search the book for other names, places and subjects of interest:
  - › look for others of the same name
  - › look for others who lived in the same place or street
  - › who was the postmaster or police officer in the town?
  - › how often and at what time did the coach arrive in town?
  - › what churches were there and what time were services held?
  - › what other activities were there in the community?
  - › look for others who had the same occupation or other interests
- all of this and more may be available in a seemingly mundane book such as a directory. You can learn much of the background of life at the time, even if your ancestor is not listed there.
- Many CDs have only one file, but some have the book content spread over several files. Adobe Reader normally searches in the file that is open at the time. If you wish to search ALL files at once choose the “All PDF documents in” option and select the CD drive or directory the files are in—Adobe Reader 6 only.

ADOBE ACROBAT SEARCHING IS A WONDERFUL FIRST FINDING AID.  
BUT DO NOT RELY ON IT TO PICK UP ALL THE INFORMATION YOU WANT
